

# Hacierco TP 85/280

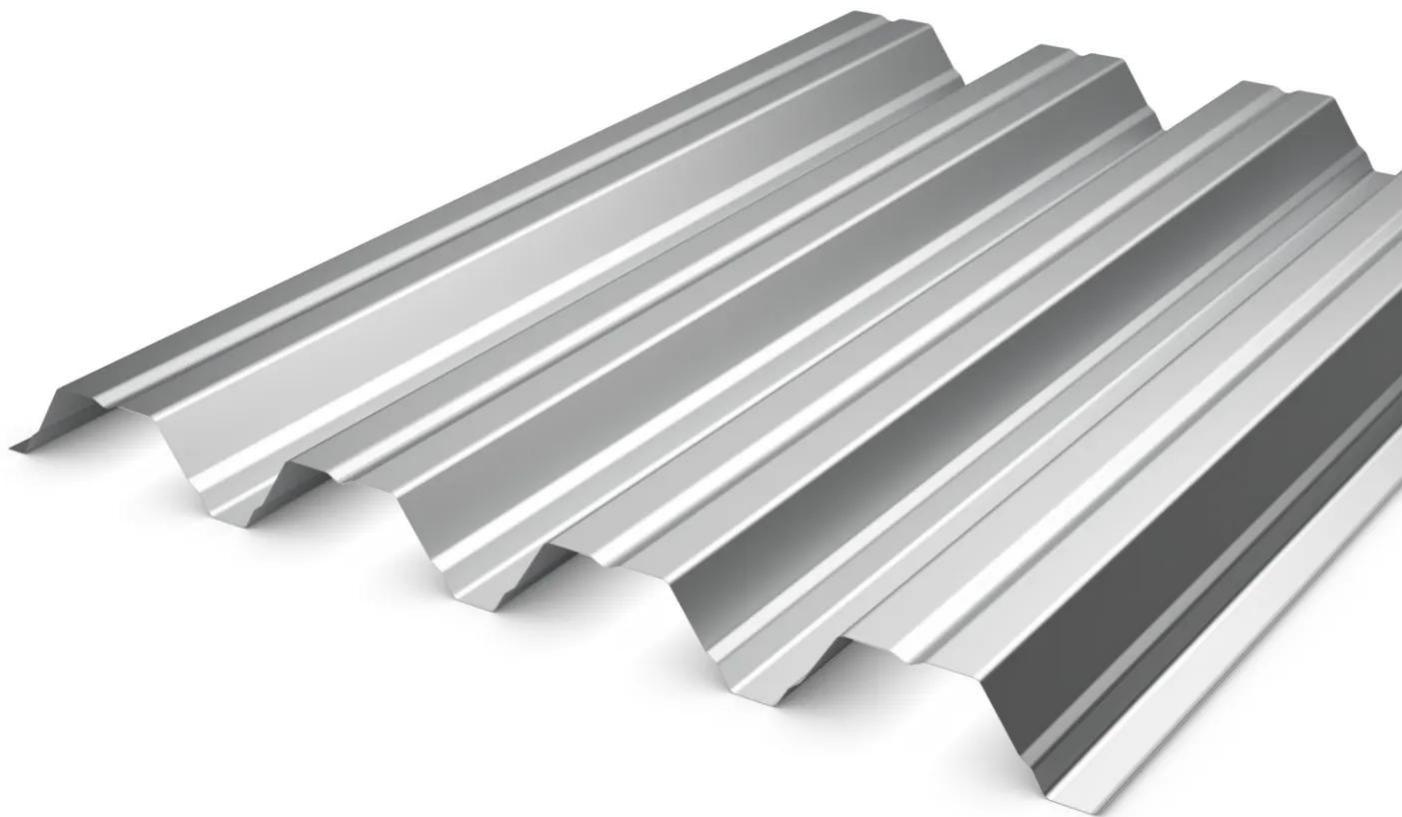

Our trapezoidal profile Hacierco TP 85/280 is usually used as a supporting profile (Tray) in the so-called positive position for thermally insulated Roof structures used. It forms the upper part of the room and can be produced in very many colors for architecturally sophisticated solutions.

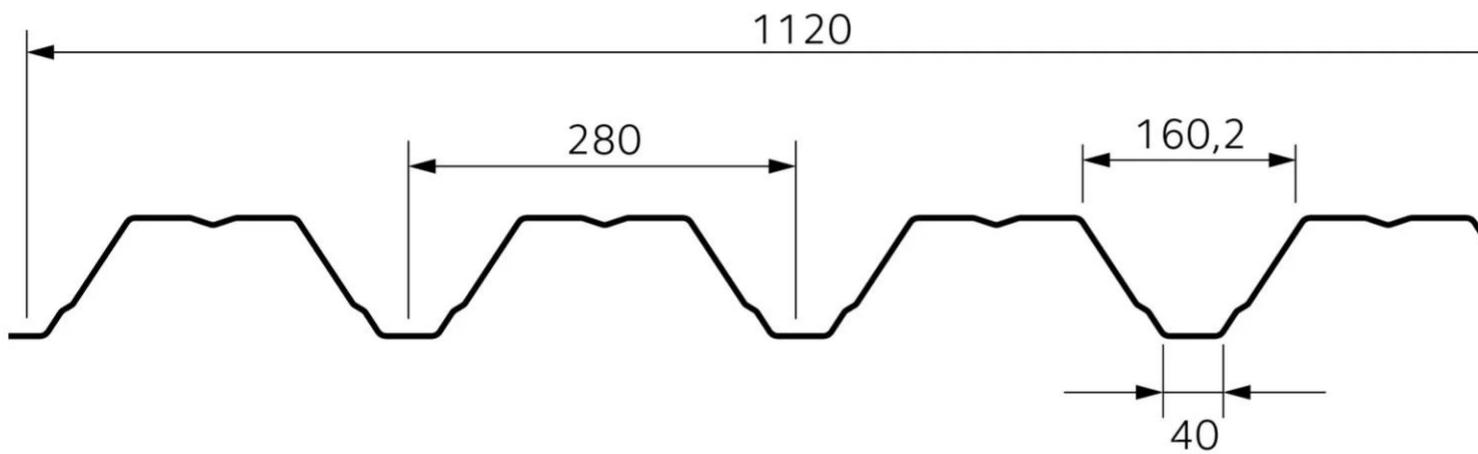

- Trapezoidal steel profile according to EN 1993-1-3
- min/max production length: 2 m / 25 m
- in steel thickness of 0,75/0,88/1,00/1,13/1,25/1,50 mm available
- Corrosion protection according to DIN 55634/ DIN EN 10346
- available as acoustic profile in perforated design
- available with anti-condensation coating
- enables sound insulation values up to 50dB
