Naturel - 35

Naturel, prepainted galvanized steel with a dual-layer thermoset polyester paint of 35µm thickness polymerized at high temperature. The surface of the finely textured paint diffuses the light for a very matte visual effect, while retaining the appearance of the metal. Naturel is usable in very sunny and maritime atmospheres such as the Caribbean, excluding the waterfront.

- Naturel enhances depth effects with its unique appearance and matte colors inspired by architects
- The surface of the fine textured paint diffuses light for a natural effect responding to new architectural trends
- This coating is suitable in industrial, urban, very sunny and slightly corrosive atmosphere
