

Authentic - 35

Authentic, prepainted galvanized steel with a 35µm thick thermosetting polyester paint, polymerized at high temperature. The proposed colors transcribe the aesthetic values of the appearance of the metal such as zinc, copper, with a palette of colors of low gloss. Authentic 35 can be used in very sunny and maritime atmospheres such as the Caribbean, excluding the waterfront.

- This coating is suitable for industrial, urban, very sunny and slightly corrosive areas. Used on the roof, it ensures an exceptional color stability that allows its use in the West Indies
- Excellent resistance to corrosion thanks to a reinforced paint system
