

Sinea® - 85

Sinea®, prepainted galvanized steel of a high-temperature polymerised, 85µm polyurethane multilayer paint. Sinea® is a high-end offer of exceptional durability and guaranteed for up to 40 years. Sinea® is resistant to extreme climates and the most severe marine atmospheres.

- Based on our experience and our desire to offer ever more efficient products, Sinea® is a 85µm multi-layer system. Since each of these layers is chemically different, the properties of the new coating outperform the individual performance of each component
- This new technology has enabled the development of the most resistant coating in the world of pre-painted steel
- In addition to its sparkling grained appearance, Sinea® offers a unique combination of properties
- Excellent resistance to ultraviolet radiation, color and gloss stability without geographical limitation, very good resistance to abrasion, shocks, scratches
